

**Discrete Mathematics**  
**Volume 188, Numbers 1–3, 28 June 1998**

**Contents**

**Contributions**

<i>R. Ahlswede and Z. Zhang</i> Code pairs with specified parity of the Hamming distances	1
<i>S.Y. Alsaadany and J. Wojciechowski</i> The basis number of the powers of the complete graph	13
<i>A.M. Assaf</i> Directed covering with block size 5 and index even	27
<i>B. Bagchi and B. Datta</i> A structure theorem for pseudomanifolds	41
<i>J. Bang-Jensen and G. Gutin</i> Alternating cycles and trails in 2-edge-coloured complete multigraphs	61
<i>O.V. Borodin, A.V. Kostochka, J. Nešetřil, A. Raspaud and E. Sopena</i> On universal graphs for planar oriented graphs of a given girth	73
<i>N. Cairnie and K. Edwards</i> The achromatic number of bounded degree trees	87
<i>J.A. Davis</i> New semiregular divisible difference sets	99
<i>A.M.H. Gerards and F.B. Shepherd</i> Strong orientations without even directed circuits	111
<i>M. Harada, T.A. Gulliver and H. Kaneta</i> Classification of extremal double-circulant self-dual codes of length up to 62	127
<i>M. Lepović</i> On formal products and spectra of graphs	137
<i>M. Li</i> Vertex pancyclism in claw-free graphs	151
<i>X. Li</i> Edge-disjoint minimum-weight connected spanning $k$ -edge subgraphs in a weighted graph: A connectedness theorem	175
<i>E. Steffen</i> Classifications and characterizations of snarks	183
<i>S. Todorčević</i> Countable chain condition in partition calculus	205
<i>L. Xiong</i> Edge degree conditions for subpancyclicity in line graphs	225

**Communications**

<i>B. Chen and S. Lawrencenko</i> Structural characterization of projective flexibility	233
--	-----

<i>J. Harant</i> A lower bound on the independence number of a graph	239
---	-----

#### Notes

<i>I. Bluskov</i> Some $t$ -designs are minimal $(t+1)$ -coverings	245
<i>E.J. Cockayne, S.M. Hedetniemi, S.T. Hedetniemi and C.M. Mynhardt</i> Irredundant and perfect neighbourhood sets in trees	253
<i>N.I. Glebov and A.V. Kostochka</i> On the independent domination number of graphs with given minimum degree	261
<i>O. Heden</i> Another Bruen chain	267
<i>X. Liu and D.B. West</i> Line digraphs and coreflexive vertex sets	269
<i>M.R. Sridharan and K. Balaji</i> Characterisation of self-complementary chordal graphs	279
<i>L. Xie, G. Liu and B. Xu</i> On endo-homology of complexes of graphs	285
<i>L. Zhao</i> The kissing number of the regular polygon	293

#### Letter to the editor

<i>N.D. Nenov</i> On the small graphs with chromatic number 5 without 4-cliques	297
Author index to volume 188	299
